

Fire suppression systems that work quickly and effectively to protect the things that matter to you.

SUPERIOR PROTECTION THROUGH SUPERIOR TECHNOLOGY.

WITH UNITED SAFETY'S FOGMAKER

- Mechanical system requires no electric assistance, providing protection for occupants, equipment, and property
- Effectively uses high-pressure water mist for engine compartments or other enclosed areas
- Ability to be installed in any engine compartment and in multiple markets including school bus, transit, forestry, logging, mining, agriculture, fire, EMS, aviation, and more
- Piston accumulator that can be mounted in any orientation storing H₂O and Nitrogen

- Reflash prevention with hot surfaces being cooled below reflash temperature, and any remaining fuel covered by aqueous foam
- Transport Canada (TC) approved
- Environmentally friendly fail safe system that attacks all components of the fire triangle
- Provides up to 4x longer duration discharge than powder systems

- Electrical power not required for system detection and activation
- Water mist spray makes engine clean-up easier, resulting in less vehicle downtime
- Reduces temperature by 1321° Fahrenheit in less than 10 seconds
